## smartSWITCH G2 HF 12DP MB S f

Automatic switching based on motion and light level

## Product description

_ Motion detector for luminaire installation

- Motion detection through glass and thin materials (except metal)
_ For automatic on/off switching of luminaires with electronic ballasts and LED drivers
_ Bright-out function: luminaire is not switched on if there is - adequate brightness
_ Delay time, detection range and light value for the bright-out
- function can be set via 9 dip switches
_ Max. installation height 12 m
_ Two housing options allowing flexible installation
_ Variable detection area (100-10 \%)
_ Zero cross switching supported
_ Second neutral terminal for easy wiring
_ Optimised for applications and environments with other wireless communication systems
_ 5 years guarantee (conditions at www.tridonic.com)

## Ordering data

| Type | Article number | Dimensions $\mathrm{L} \times \mathrm{W} \times \mathrm{H}$ | Packaging, carton |
| :--- | :---: | :---: | :---: |
| $\boldsymbol{s m a r t S W I T C H ~ G 2 ~ H F ~ 1 2 D P ~ M B ~ f ~}$ | $\mathbf{2 8 0 0 4 3 7 2}$ | Weight per pc. |  |
| smartSWITCH G2 HF 12DP MB S f | $\mathbf{2 8 0 0 4 3 7 3}$ | $\mathbf{7 0 \times 3 6 . 5 \times 2 4 . 5 \mathrm { mm }}$ | 0.04 kg |

| Technical data |  |
| :--- | :--- |
| Rated supply voltage | $220-240 \mathrm{~V}$ |
| Mains frequency | $50 / 60 \mathrm{~Hz}$ |
| Power | $<0.45 \mathrm{~W}$ |
| Frequency | $5.8 \mathrm{GHz}( \pm 75 \mathrm{MHz})$ |
| Transmission power | $<0.1 \mathrm{~mW}$ |
| Load resistive | 800 W |
| Load capacitive | 400 VA |
| Detection angle | $30-150^{\circ}$ |
| Max. detection area | $\boxed{12 \mathrm{~m}}$ |
| Max. mounting height | 12 m |
| tc | $75^{\circ} \mathrm{C}$ |
| Ambient temperature ta | $-20 \ldots+70^{\circ} \mathrm{C}$ |
| Storage temperature ts | $-20 \ldots+70^{\circ} \mathrm{C}$ |
| Humidity | min. $5 \ldots .$. max. $85 \%$ at $30^{\circ} \mathrm{C}$ |
| Type of protection | IP 20 |
| Protection class | Reinforced insulation |
| Housing material | PC, halogen-free |
| Housing colour | RAL 9016 (white) |
| Lifetime | $50,000 \mathrm{~h}$ |
| Guarantee | 5 Year(s) |

### 1.1 Glow-wire test according to IEC 60598-1

$850^{\circ} \mathrm{C}$ passed

## 2. Common

smartSWITCH G2 HF 12DP MB fand S f provides simple cost-effective motion detection in combination with the corridorFUNCTION offered by Tridonic LED driver.
When the sensor detects movement it triggers a predefined motion detection profile in the LED driver.
When exceeded the user-definable light value at the integrated light sensor the LED driver remains switched off.
High-frequency technology enables the sensor to be installed in completely enclosed luminaires.

## 3. Installation

- Not for use with phase cut dimmers.
- The power supply must be disconnected before installation.
- Suitable for installation only in indoor luminaires without vibration.
- Motion detection: only possible through thin housing material (e.g. plastic or glass), do not use metal housing.
- The sensor must protrude over the light sources if you use the integrated light sensor.
- Light sensor: must be able to detect reflected artificial light and reflected daylight.
- Reflected HF waves (e.g. of walls, floors, ceilings or furniture) and other HF transmitters can influence the motion detection.
- Avoid direct illumination of the light source on the sensor including housing.

## 3. Thermal details and lifetime

### 3.1 Expected lifetime

| Expected lifetime |  |  |
| :--- | :--- | :---: |
| Type | ta | $70^{\circ} \mathrm{C}$ |
| smartSWITCH G2 HF 12DP MB (S) | tc | $75^{\circ} \mathrm{C}$ |
|  | Lifetime | $50,000 \mathrm{~h}$ |

The device is designed for a lifetime stated above under reference conditions and with a failure probability of less than $10 \%$.

### 3.1 Wiring diagram

### 3.2 Combination multiple sensors and drivers

Maximum load (capacitive): 400 VA

### 3.3 Wiring type and cross section

For wiring use stranded wire with ferrules or solid wire from 0.75 to $1.5 \mathrm{~mm}^{2}$
Strip 8 mm of insulation from the cables to ensure perfect operation of the push-in terminals.
Use one wire for each terminal connector only.
wire preparation:
$0.75-1.5 \mathrm{~mm}^{2}$

### 3.4 Minimum spacing for further sensors

## 4. Functions

### 4.1 Setting up

## Setting the detection area

To avoid unnecessary switching on of the lighting system due to an excessively large detection area, this can be limited.
The detection area indicates the diameter within motion is detected.

|  | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | Sensitivity |
| :---: | :---: | :---: | :---: | :---: |
| I | $\bullet$ | $\bullet$ | $\bullet$ | 100 \% (default) |
| II | $\bigcirc$ | $\bullet$ | $\bullet$ | $75 \%$ |
| III | $\bigcirc$ | $\bullet$ | $\bigcirc$ | $50 \%$ |
| IV | $\bigcirc$ | $\bigcirc$ | $\bullet$ | $30 \%$ |
| $\mathbf{V}$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $10 \%$ |

## Setting the switch-off delay

To avoid unnecessary switching on and off of the lighting system it is possible to set a switch-off delay. The delay starts after the last motion in the detection area. With the detection of further motion during this delay it is retriggered. At the end of the delay the light will be switched off or the corridorFUNCTION is started.

|  | 4 | 5 | 6 | Hold time |
| :---: | :---: | :---: | :---: | :---: |
| I | - | - | - | 5 s (default) |
| II | - | $\bigcirc$ | - | 30 s |
| III | - | $\bigcirc$ | $\bigcirc$ | 1 min |
| IV | $\bigcirc$ | - | - | 5 min |
| V | $\bigcirc$ | - | $\bigcirc$ | 10 min |
| VI | $\bigcirc$ | $\bigcirc$ | $\bullet$ | 20 min |
| VII | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | 30 min |

Setting the daylight threshold value
To avoid unnecessary switching on of the lighting system when there is adequate illuminance, a threshold value can be set. The threshold value indicates up to which illuminance value detected movement cause the lighting system to switch on.

|  | $\mathbf{7}$ | $\mathbf{8}$ | $\mathbf{9}$ | Daylight sensor |
| :---: | :---: | :---: | :---: | :---: |
| I | $\bullet$ | $\bullet$ | $\bullet$ | Disable (default) |
| II | 0 | $\bullet$ | $\bullet$ | 50 Lux |
| III | 0 | $\bullet$ | 0 | 20 Lux |
| IV | 0 | 0 | $\bullet$ | $\square$ |
| V | 0 | 0 | 0 | $\square$ |

## Note:

Set the threshold value to I = Disable to ensure the sensor switches on in conjunction with the corridorFUNCTION.
In this setting the sensor will always switch on.

## 4.2 corridorFUNCTION

The corridorFUNCTION can be activated by applying a voltage of 230 V for 5 minutes at the switchDIM connection of the control gear or via corridorFUNCTION Plug.
Note: To apply a voltage of 230 V for 5 minutes at the switchDIM input of the control gear the sensor must detect motion for more than 5 minutes or a switch-off delay longer than 5 minutes must be set

### 4.3 Start up behaviour

20 seconds after mains is connected, the sensor is ready and indicates this by switching on the green LED.

### 4.4 Motion detection

Ceiling mounted:

| Sensibility |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{h}$ | $\mathbf{1 0 0} \%$ | $\mathbf{7 5} \%$ | $\mathbf{5 0} \%$ | $\mathbf{3 0} \%$ | $\mathbf{1 0} \%$ |  |  |  |  |
|  |  |  |  |  |  |  | $\mathbf{d}$ |  |  |
| 5 m | 12 m | 9 m | 6 m | 3 m | 1 m |  |  |  |  |
| 6 m | 12 m | 8 m | 3 m | 1 m | - |  |  |  |  |
| 7 m | 12 m | 6 m | 3 m | - | - |  |  |  |  |
| 8 m | 12 m | 5 m | 2 m | - | - |  |  |  |  |
| 9 m | 12 m | 4 m | 1 m | - | - |  |  |  |  |
| 10 m | 12 m | 3 m | - | - | - |  |  |  |  |
| 11 m | 10 m | 2 m | - | - | - |  |  |  |  |
| 12 m | 10 m | 1 m | - | - | - |  |  |  |  |

Wall mounted - passing by:

| $\mathbf{x}$ | $\mathbf{y}$ | $\mathbf{h}$ | Sensibility |
| :---: | :---: | :---: | :---: |
| 12.0 m | 10 m | 1.8 m | $100 \%$ |
| 9.0 m | 8 m | 1.8 m | $75 \%$ |
| 6.0 m | 6 m | 1.8 m | $50 \%$ |
| 2.0 m | 4 m | 1.8 m | $30 \%$ |
| 1.5 m | 3 m | 1.8 m | $10 \%$ |

Wall mounted - moving towards:

| $\mathbf{x}$ | $\mathbf{y}$ | $\mathbf{h}$ | Sensibility |
| :---: | :---: | :---: | :---: |
| 15 m | 15 m | 1.8 m | $100 \%$ |
| 12 m | 12 m | 1.8 m | $75 \%$ |
| 8 m | 8 m | 1.8 m | $50 \%$ |
| 6 m | 6 m | 1.8 m | $30 \%$ |
| 4 m | 4 m | 1.8 m | $10 \%$ |

Diameter of the detection cone as a function of height at maximum detection area without taking objects in the room into consideration. Stationary objects (walls, tables, floor-standing luminaires, etc.) located in the direct view of the sensor change the characteristics of the detection area.
The mentioned values are typical values depending on the environment and application the detection area may change.

### 4.5 Detection sensitivity

Optimized for detection of pedestrians with a speed of $0.5-1.5 \mathrm{~m} / \mathrm{s}$ corresponds to $1.8-5.4 \mathrm{~km} / \mathrm{h}$
Depending on the application and environmental conditions the maximum detectable speed of object may vary.

## 5. Miscellaneous

### 5.1 Disposal of equipment

## 是

Return old devices in accordance with the WEEE directive to suitable recycling facilities.

### 5.2 Additional information

Additional technical information at www.tridonic.com $\rightarrow$ Technical Data

Guarantee conditions at www.tridonic.com $\rightarrow$ Services

Lifetime declarations are informative and represent no warranty claim. No warranty if device was opened.
